THE PIPING PROFESSIONALS

THE PIPING PROFESSIONALS

INTRODUCTION

SRJ Group was started in 1985 as S.R Jadhav & Co. offering and specializing in total solution in Fire protection systems which include sprinklers, yard hydrant, Fire Alarm and Fire Extinguishing and public address system, all types of industrial piping, Machine hookup's, heavy steel and structural work, and PHE projects. We provide Economical, Efficient, Effective & Reliable solutions to manage Industrial needs for fluid transmissions. SRJ Group has two companies under its wing, S.R Jadhav & Co. and SRJ Piping India Pvt Ltd.

HOW WE WORK?

Thanks to our strong and experienced project management competence, We at SRJ are capable of handling all stages of a project. With strong customer focus, We carry out our works through skilled manpower with world class tools and technology. Our team are well-versed in the codes and in the standard development process and stay up to date with the latest code changes and technology. We design the system by understanding a building's occupancies, and the protection philosophy of management. Our In-house design team suggests ways to cut costs for the client while not compromising on the quality and standards.

HOW WE WORK?

Since every system must meet the minimum requirements of the various codes and standards, we ensure that the design is complete before a Professional Engineer stamp is applied. We have the installation knowledge and experience in this industry to deliver the best services to our clients. The company is driven by high values that include integrity, transparency and delivering the highest quality within specified time period with full customer satisfaction and this is why, more than 90% of our business is from our existing customers as they trust our company and what we have to offer.
